

Nora Foods

The system consists of managing the food orders of the members of cornershop to the owner of the system called Nora. She, create the menu of the day and then it should be sent by employees through an automatic slack message. Then, the employees choose the option they like best from the menu and must send this order back to the system. Below is the system model.

First, we will show the Nora user manual. Nora must log in with the super user account generated at the installation. The first thing you will see, will be the list of menus you have created.

Then, to create a new menu you must press the plus button in the upper right corner. This will be taken by the menu creation form.

The screenshot shows the 'Crear Menú' (Create Menu) form in the 'Nora's Food' application. At the top, there is a dark header bar with the text 'Nora's Food' on the left and a settings gear icon on the right. Below the header, the text 'Crear Menú' is displayed in a large, bold font. To the right of 'Crear Menú' is a teal button with a white plus sign. Below this, there are two input fields. The first field is labeled 'Fecha' (Date) and contains the placeholder text 'Ingrese la fecha del menu'. The second field is labeled 'Opciones' (Options) and is empty. Below the 'Fecha' field is a blue button labeled 'Enviar' (Send).

To create a menu, you must insert a date and select the options. If the option is not in the list, it must be created by pressing the plus button in the upper right corner and filling in the corresponding form.

Nora's Food

Crear Opción

Nombre

Ingrese el nombre de la opción, Ej: Arroz con pollo

Enviar

After creating a menu, it must be sent to slack with the corresponding button in the menu list, marked in the following image.
